

## Superior Wet Performance

### Fiercely Performs in Water

- Water Filled Conduits
- High Water Tables
- Flooded Vaults

### Kerite Cables Have Stood the Toughest Test of All

- Kerite wet design cables were used in the first submarine cable applications over 100 years ago
- Kerite submarine cables are still used in some of the harshest environments
- The same wet design used in Kerite submarine cables is used in Kerite utility distribution cables
- Kerite wet design distribution cable will perform in the typical utility trouble spots; flooded vaults, water-soaked conduit and high ground water applications
