

Kerite Cable Services Project Profile

Project	Little Creek Amphibious Naval Base- Subsea Power Cable Installation
Client	US NAVY - J.C. Driskill
Location	Virginia Beach, VA
Cable Design	35 kV 750kcmil CU
Length	2 lengths of 3,400ft
Subcontractor(s)	Kokosing Construction Company (Durocher Marine)
Scope	Design, manufacture and install two 3,400ft lengths of 35kV three conductor subsea cable. Cable was pulled through 10inch stainless steel conduit which had been installed using a directional drill under the creek at the US NAVY Amphibious base. KCS field personnel completed 4 armor terminations, 12-600 Amp load break elbows and performed final acceptance testing on the power cable.

50 ton cable reels being offloaded in Virginia Beach

Directional drill across Little Creek at the Amphibious Naval Base
