

Perch Preventer

The HPP-24 Perch Preventer is a unique hinged adjustable device designed to prevent birds from landing between phases on transmission and distribution structures. The HPP-24 is mounted to a cross arm using either nails or small lag screws. The Perch Preventer is molded using proprietary, gray, high density polyethylene.

Benefits

- Prevents birds from perching and nesting
- Prevents injury to birds
- Reduces circuit outages
- Adjustable and easy to install
- Environmentally friendly – High Density Polyethylene is 100% recyclable

Application

The HPP-24 Perch Preventer is shipped assembled and ready to mount on a wood, fiberglass, or steel channel cross arm. The legs are adjustable from a 6" to 24" spacing and will fit between different phase spacing. The HPP-24 can be nailed or bolted to the cross arms. Mounting is fast and easy.
